EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christopher McGeehan on 4-26-06.

The application has been amended as follows:

In the claims:

In claim 10, line 3, “, Diolen” has been deleted.

In claim 18, line 3, “, Diolen” has been deleted.

Claims 21 and 22 have been cancelled.

In claim 23, line 1, the word “hub” has been changed to --method--.

In claim 23, line 2, after the word “openings” the word --formed—has been added.

2. The following is an examiner's statement of reasons for allowance: None of the prior art of record taught the formation of a hub wherein an initial body blank having uniform thickness was formed in a molding operation and an additional shaping device was provided with an additional quantity of fiber and cross linking agent and inserted into the body blank and bonded to the body blank as claimed. It should be noted that the reference to Loyd (newly cited) disclosed molding composite material on the interior

of a hollow shaft in the manufacture of a drive shaft, however there is no reason to believe that one would have performed this operation in a hub which had a body blank made of uniform thickness from composite material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
